Jaipur, Rajasthan, India, 303905

OBJECTIVE

BBA (Digital Marketing) student eager to apply hands-on experience in paid Meta Ad campaigns, SEO, social media growth, and Google Business Profile management to drive measurable brand growth. Grew a client social page's reach from 7K to 110K+ and delivered 33K impressions on a INR 400 Meta Ads test budget.

EXPERIENCE

Digital Marketing Intern — First Attempt

May 2026 – Present

Jaipur, India

- Ran a Meta Ads campaign that delivered 33,000 impressions on a INR 400 test budget, demonstrating efficient low-budget audience targeting.
- Increased a client's social media page reach from 7K to 110K+ (15x growth) through content and posting strategy.
- Performed on-page SEO and keyword/hashtag research for client First Job Hub to improve organic search visibility.
- Created and optimized a Google Business Profile that generated 100+ views within 10 days of running ads, improving local search visibility.
- Handled quality testing of marketing assets and campaign pages before launch.

Operations Intern — Findtern

Nov 2025 – Jan 2026

Jaipur, India

- Conducted bug testing, digital marketing content creation, and data research in a fast-paced operations role spanning technical and creative work.
- Identified and reported 100+ bugs through quality assurance testing, collaborating with cross-functional teams on operational activities.

Business Development Intern — Drone Rangers

Aug 2025 – Oct 2025

Jaipur, India

- Led client outreach and campaign planning/execution for close to 300 prospective clients, supporting business development activities.
- Built target audience research and reach plans, generating 25 sales leads from target markets to support the company's growth strategy.

PROJECTS

YouTube Content Channel — Independent Creator

Feb 2024 – Mar 2024

- Established and grew a YouTube channel producing daily short-form videos from trending topics, reaching an average of ~65K monthly views.
- Edited all video content end-to-end and incorporated AI tools to increase production speed and output consistency.

Website SEO & Audit Tool

Directed AI-Assisted Development, Node.js/Playwright

- Conceptualized and specified a full-site crawler (sitemap parsing, recursive/BFS crawling, URL normalization and deduplication) to automatically discover all pages on a website, directing AI tools to build it.
- Planned and tested automated SEO, accessibility, performance, and security audit modules covering 25+ checks, including meta tags, heading structure, alt text, broken links, page speed metrics, and

security headers.

- Defined the reporting structure for a JSON-based reporting engine generating separate module-wise audit reports (SEO, performance, accessibility, security, broken links) for every crawl.
- Directed AI-assisted development of an interactive CLI workflow with full-audit mode, individual module testing, and reusable crawl data for faster re-runs.

Personal AI Browser QA Agent

Playwright, MCP (Directed AI-Assisted Development)

- Directed AI-assisted development of a Playwright/MCP-based browser automation and QA testing agent with self-healing element recovery and a smart assertion engine covering 13 assertion types.
- Specified a multi-provider AI orchestration layer (OpenAI, Claude, Gemini) with automatic failover and cost/latency-based routing across providers.
- Defined requirements for a test evidence engine capturing screenshots, DOM snapshots, and failure logs, validated across 29 automated regression test suites.

Post Link Collector CLI

Python (Directed AI-Assisted Development)

- Conceptualized a Python CLI tool to collect post and video links from YouTube, LinkedIn, Instagram, and Facebook via direct web scraping, requiring no API keys.
- Directed AI-assisted development of deduplication logic and multi-format export (TXT, CSV, JSON), validated with an automated test suite.
